Purpose

1. The purpose of this policy is to set out the principles which relate to assessment and feedback at the University of Salford.

Scope

2. This policy applies to all students undertaking taught programmes at levels 3 – 7 at the University of Salford and its partner institutions.

Definitions of Assessment, Assignment and Feedback

3. Assessment as used in this policy refers to all forms of assessed activity, for example, coursework, presentation, test, portfolio and examination.
4. Assignment is used to refer to the specific task which a student is asked to complete.
5. The Quality Assurance Agency has defined formative and summative assessment¹ as follows:
***Formative assessment** has a developmental purpose and is designed to help learners learn more effectively by giving them feedback on their performance and on how it can be improved and/or maintained. Reflective practice by students sometimes contributes to formative assessment.*
***Summative assessment** is used to indicate the extent of a learner's success in meeting the assessment criteria used to gauge the intended learning outcomes of a module or programme.*
6. To aid student understanding of the purpose of the tasks, formative tasks are referred to as opportunities to 'Practice for Success'.
7. Feedback as used in this policy refers to all information provided to students about their performance in an assignment task that enables them to learn. Feedback is a necessary component of learning and therefore should be a feature of all assessment tasks and assessment for learning.

Assessment and Feedback Principles

8. Assessment is used a variety of different purposes:
 - Assessment *of* learning: used for certification: identifying levels of achievement; awarding credit and qualification; assurance of academic standards.
 - Assessment *for* learning: promoting student learning through timely, actionable feedback; motivating, guiding their approach to learning; giving the tutor useful information regarding effectiveness of teaching strategies.
 - Assessment *as* learning: where students develop an awareness of how they learn and use that awareness to adjust and advance their learning, taking an increased responsibility for their learning.²

² [Principles of Good Assessment and Feedback \(JISC, 2022\)](#) Bloxham & Boyd (2007) Developing Effective Assessment in Higher Education

9. The University's goal is to ensure that all students benefit from an inclusive assessment strategy and the following principles should inform the approach to assessment and feedback:

Clear - we employ straightforward language and processes in our assessment briefs and feedback, ensuring students know what is expected of them throughout their educational journey.

Understood - by simplifying assessment and feedback mechanisms, clearly aligned with module learning outcomes, learning activities, and the wider programme, we foster shared comprehension between staff and students, promoting universal assessment literacy.

Authentic developed in partnership with stakeholders, resonating with students' interests and lived experience, ensuring they are anchored in practical real-world skill application, preparing them for the professional world.

Robust - with opportunities for formative and synoptic assessment of student activity.

Personalised - offering opportunities for diverse activities with flexible assessment options and opportunities for negotiation, allowing students to express their knowledge in various ways, so that assessments cultivate community and ownership.

10. Assessment at the University of Salford will also:

- Be inclusive in design, providing all students with the opportunity to achieve learning outcomes associated with their modules and programmes to the best of their abilities³;
- Promote academic and professional ethical practice;
- Include active and collaborative tasks;
- Involve appropriate stakeholders, including industry partners;
- Be conducted equitably and securely in line with University regulations and processes;
- Help students to develop through the provision of, and engagement with, timely and constructive feedback.
- Provide a valid, reliable and transparent measure of student achievement and proficiency relative to the specific learning outcomes;
- Support future employment and encourage students to embark on professional pathways;
- Provide stakeholders with confidence in the quality and standards of University of Salford awards.

³ Details of the University's Inclusive Student Experience Project are available via <https://testlivesalfordac.sharepoint.com/sites/DisabilityLearnerSupport/SitePages/Inclusive-and-Accessible-Teaching-Framework.aspx>

Assessment and Feedback Policy

11. All assessment is conducted in line with the University's [Academic Regulations for Taught Programmes](#).
12. Examinations are conducted in line with the University's Examination [Rules and Regulations](#). If a student is unable to attend an examination at a particular time due to religious observance, guidance is available [here](#).
13. All modules must be assessed in line with the approved module specification using the validated assessment strategy. The assessment strategy should be designed to encourage student engagement with each assignment task.
14. Assignment tasks must be aligned with module and programme learning outcomes, and marks should only be awarded against marking criteria which relate directly to those learning outcomes. If marks for contribution/engagement are used these must be explicitly identified in the assessment brief and marking criteria. Penalties must not be applied for non-attendance.
15. Each module must contain at least one component of assessment. The [Academic Regulations for Taught Programmes](#) provide further information about the maximum permitted number of components of assessment. Marks are awarded for whole components of assessment and sub-components should not be used. Where a single component of assessment comprises a number of parts, but has one submission date, as in a portfolio or project, a single mark should be awarded for the whole assessment and only this mark will be recorded.
16. To help support the transition of students into Higher Education there should be no formal written examinations in Trimester 1 for students at levels 3 and 4 within any mode of module delivery (short fat – one trimester in length, or, long thin – two trimesters in length), this does not preclude the use of other types of assessment carried out under time-limited conditions. Formal written examinations are permitted where this is a requirement of a PSRB, or subject to additional accreditation awarded by external bodies. A note to this effect should be included in relevant programme approval documentation.
17. All assignment tasks (with the exception of examinations) must be provided to students electronically using the University's [assessment brief template](#). This is the set of instructions outlining the type of assessment and the specific criteria for the assignment task. As a minimum, assessment briefs must include:
 - a description of the assignment task (which may include a word count or length);
 - the intended learning outcomes;
 - the submission date;
 - process for submission;
 - referencing style/requirements;
 - allocation of marks and grade descriptors;
 - marking criteria;

- the date on which feedback is due and the mode of feedback;
 - details of how students can engage in 'practice for success' during preparation for the assignment task.
18. Examination papers must be prepared in accordance with guidance provided by Student Administration. Marking schemes are also required and should form part of the verification process.
19. All assignment tasks shall normally take place within modules during the approved duration of each programme. The final submission date for assignment tasks must not exceed the end point of a programme as set out in the Programme Specification. This is to ensure compliance with Home Office requirements in relation to programme end dates which are specified in Confirmation of Acceptance for Studies (CAS).

Security of Assessment Materials

20. All individuals involved in the assessment process, including academic staff, Independent Assessors, External Examiners and professional service staff, are expected to take care with how they handle assessment materials to maintain the integrity, security and confidentiality of assessments. Assessment materials, both digital and hard copies, must be stored securely until required. Any concerns that the integrity, security or confidentiality of assessment materials has been compromised should be urgently reported to the School Office and notified to QMO@salford.ac.uk.

Verification

21. Verification of summative assessment briefs and marking schemes is used to ensure that the assessment of students is appropriate and promotes effective learning.
22. The purpose of verification is to consider:
- the appropriateness of the module assessment strategy in relation to the module's intended learning outcomes;
 - the clarity of instructions within the assessment brief to support completion of the assignment task(s) and consideration of marking schemes/model answers;
 - the appropriateness of the marking scheme.
23. The verification process is described in Appendix A.

Assessment Submission

24. Programme teams shall produce an assessment schedule one week prior to the induction period at start of each academic year to document all assessment and assessment deadlines. This is to ensure that module assessment activity is scheduled in an appropriate manner, this should ensure that all students receive timely feedback on performance through early assessment, that assessments are spaced in a manner that avoids bunching and promotes progressive learning through the staggering of submission dates throughout the academic year. The assessment schedule shall be published on Blackboard for students to access.
25. Assessment briefs, including submission dates, shall be published at the start of each module via module information on the module site within Blackboard.

26. Submission dates must not be scheduled on dates when the University is officially closed and when setting due dates, consideration should be given to the impact of the late submission period (see section 36). In the event of exceptional circumstances resulting in students being unable to meet a published submission deadline, modifications may be made, with the agreement of the relevant Associate Dean (Academic). Any changes must be documented in the Module Leader Report and entered into the Banner system.
27. Programme teams should strive to accommodate major religious festivals of all faiths in its planning, though this is not always possible. Programme teams should consider significant dates when setting submission dates. Further information is available through askUS.
28. The University's assessment process takes place principally electronically, this includes electronic submission, marking and feedback. All written assessment tasks must be submitted through Blackboard unless an exception has been granted by the Head of Academic Quality. Wherever practical to do so, other types of assessment tasks artifacts should also be submitted via Blackboard, specific exemption does not need to be sought where Blackboard is not used for such assessments.
29. Module leaders must make ensure that all submission areas are set up in accordance with [University guidelines](#).
30. Exceptions to electronic submission are considered as part of the module approval and amendment process through the [Programme Validation and Review Procedure](#). Alternative arrangements for submission may be considered for students studying at collaborative partner institutions. Alternative arrangements must be agreed and logged with the Quality Management Office.
31. When submitted online, assessments will be receipted electronically, or confirmation of receipt provided on screen. When an assessment is legitimately submitted offline, students must use the [assessment submission form](#). Schools must ensure that there is a robust system for the timed receipting of student work, again using the [assessment submission form](#).
32. Whether online or offline, the deadline for submission of assessments is 16:00 UK time on the specified submission date, which should normally be a weekday, except where the relevant module is normally delivered on a weekend. Any submission after 16:00 UK time, even if by only a few seconds, will be considered as late.
33. When work is submitted through Blackboard, only one submission for each assessment is possible. If an incorrect version has been submitted, students can contact Digital IT to request the submission is removed. Where a submission is removed, and the subsequent submission is within the late submission period, late submission rules apply.
34. It is a student's responsibility to ensure that assessments are submitted successfully and that the correct version has been submitted for assessment. In the case of online submission, students must ensure that assessments are submitted to the correct submission area.

35. It is a student's responsibility to ensure that assignment tasks are submitted successfully and that the correct version has been submitted for marking. In the case of online submission, students must ensure that assignment tasks are submitted to the correct folder or equivalent. If a student discovers, after the submission deadline, that an assignment task has been submitted to an incorrect Blackboard or Turnitin folder, they should contact the Module Leader to request that the submission is marked, as long as this occurs prior to the meeting of the Module Assessment Board which formally ratifies module marks.

Late Submission

36. The University's late submission period is seven consecutive days following the submission date. The seven consecutive day period includes weekends and Bank Holidays but not extended periods of official closure e.g. Christmas, Good Friday and Easter Monday.
37. The late submission period applies to all assessment attempts (including resit attempts) except In-Year Retrieval Assessment attempts. Late submission arrangements do not apply to examinations or similar scheduled and timed assessment events such as presentations or performances.
38. Where assignment tasks are submitted in the late submission period, the following rules apply:
- If the work is no more than seven days late, then if the work would otherwise be of a pass standard, then the mark for the work shall be capped at the pass mark for the component. If the mark achieved is lower than the pass mark, then no penalty will be applied.
 - If the work is no more than seven days late and graded either Pass or Fail, then no penalty shall be applied.
 - If the work is more than seven days late then it cannot be submitted. It will be recorded as a non-submission (NS) and no feedback will be provided.
 - Late submission rules only apply to whole components and no penalties should be applied to individual elements of portfolio/project type assessments.
39. Reasonable Adjustment Plans and Carer Support Plans (see section 73 for further information) which have assessment adjustments for submission deadlines will be for a period of up to seven days only for any assessment attempt, and not subject to penalties for late submission of assessment within the adjusted deadline. Penalties for late submission in line with section 36 will apply after the adjusted deadline has elapsed.
40. Where a student has valid reasons for submitting an assignment task late, and has a request for Personal Mitigating Circumstances accepted through the Personal Mitigating Circumstances Procedure, the penalty applicable for late submission will be removed.
41. Where students have submitted an assignment task later than the published deadline, as permitted by the late submission period or by a Reasonable Adjustment Plan/Carer Support Plan, programme teams should still aim, where possible, to provide feedback within 15 working days of the published deadline, and in any case no later than 15 working days after the date the assignment task was submitted. The 15 working day

period for provision of feedback does not include days when the University is officially closed, for example weekends, bank holidays or during the Christmas closure period.

Network/System Failure

42. Where there is an unexpected University network failure, and Blackboard not accessible at the deadline for submission or in the 12 hour period before that time, the Head of Academic Quality (or nominee) will determine the course of action to be taken.
43. Where a student experiences a technical issue with University systems which means that they are unable to complete their assignment task, they must report this to Digital IT immediately and obtain confirmation of their report which be required to support a personal mitigating circumstances (PMC) or academic appeal request.

Marking and Feedback

44. All summative assessments are either awarded a numerical mark expressed as a percentage or a pass/fail grade.
45. All marks are awarded in line with the University marking scale of 0-100%. Programme teams may choose to adopt the stepped marking scheme detailed in Appendix B.
46. All assignment tasks are marked using specific criteria which are shared with students at the start of the module. Marking criteria will align with programme and module intended learning outcomes.
47. The University provides brief descriptors of level of performance. Schools are required to develop, implement and review annually subject-specific performance descriptors that align with the University descriptors. Schools should ensure that any issues arising from their annual reviews of subject-specific performance descriptors and their relationship to University descriptors are recorded in relevant Programme Action Logs in line with the Programme Monitoring and Enhancement Procedure.
48. At levels 3, 4, 5 and 6 the pass mark is 40% and the scale is:

Percentage Mark	Level of Performance
90 - 100	Outstanding
80 - 89	Excellent
70 - 79	Very Good
60 - 69	Good
50 - 59	Fair
40 - 49	Adequate
30 - 39	Needs improvement
20 - 29	Needs significant revision
0 - 19	Needs substantial work

49. At level 7 the pass mark is 50% and the scale is:

Percentage Mark	Level of Performance
90 - 100	Outstanding

80 - 89	Excellent
70 - 79	Very Good
60 - 69	Good
50 - 59	Satisfactory
40 - 49	Needs improvement
30 - 39	Needs significant revision
0 - 29	Needs substantial work

50. Where assignment tasks are awarded pass or fail grades, the requirements for passing the assessment must be described in the assessment brief.
51. All summatively assessed work must be marked anonymously where possible and practical to do so; however, there will be some forms of assessment where this is not possible, for example observed assessments such as performances and presentations.
52. Calibration activities are required for assignment tasks offered on apprenticeships and collaborative provision programmes. Standardisation activities are required for assignment tasks offered on collaborative provision programmes and where more than one person is marking the work (i.e. there is a marking team). Calibration and standardisation are defined in Appendix D along with a description of the processes.
53. Marks and feedback (for summatively assessed work) shall be provided to students within 15 working days of the published submission deadline except where concerns relating to academic misconduct arise. In such instances, the marker may cease marking and prepare a case for referral to the School's Academic Misconduct Officer. Feedback will not normally be given to the student until the case has been considered. Where students have submitted later than the published submission deadline due to a Reasonable Adjustment Plan/Carer Support Plan, or use of the late submission period, section 40 outlines requirements in relation to the timing for provision of marks and feedback.
54. All marks and, where appropriate, feedback should be returned to students via Blackboard.
55. The QAA's UK Quality Code provides guidance on how effective feedback is achieved:

*Effective feedback enables students to understand the strengths and limitations of their performance, and to recognise how future performance can be improved.*⁴
56. The scheduling and availability of feedback will be dependent on the nature of the assignment tasks undertaken and at the discretion of the programme team. Arrangements for obtaining feedback as part of 'Practice for Success' should be clearly articulated to students. Programme teams will need to ensure that students have sufficient time to act on any feedback received.
57. The purpose of feedback is to support learning and therefore should identify strengths and where there is room for improvement and development. Feedback should be

⁴ [QAA's UK Quality Code for Higher Education Advice and Guidance Assessment](#) (2018)

provided for all summative assessments with the exception of formal written examinations, must, as a minimum:

- provide an un-ratified mark or grade;
- indicate how marks were arrived at with explicit reference to the descriptors and marking criteria for the assignment task (see sections 46 - 50);
- present constructive, developmental comments on the assignment task, including reference to successful and less successful aspects of the task, and advice on how to improve.

58. Feedback should provide the following information:

- What the student did well in this task (briefly describing the main strengths).
- Where improvements could be made to the task (detailed and clearly explained points).
- What the student should consider for future tasks (how feedback should be applied to improve the next/later similar elements of assessment).

Feedback is delivered differently for End Point Assessment (EPA) tasks on integrated apprenticeship programmes. When commenting on where improvements could be made at EPA, feedback should not risk breaching the confidentiality of the assessment questions. For example, the marker should refrain from saying 'if you had covered / written X, you would have passed'. Furthermore, EPA feedback must not include considerations for future tasks because the EPA is the final assessment of the apprenticeship programme.

59. In addition to meeting the standards set out in this Policy, programme teams must ensure that they meet any standards for feedback required by relevant Professional, Statutory and Regulatory Bodies.

60. For written examinations feedback should, as a minimum, constitute:

- a mark or grade;
- an opportunity for students, upon request, to view their annotated examination script and receive verbal feedback of the type described in section 57.

61. Although examination scripts are exempt from subject access requests under the General Data Protection Regulation, comments made by assessors and moderators are not exempt and should be provided to students if requested. Where requested, examiners' comments must be transcribed onto a separate sheet.

62. Feedback should be easily accessible and clear, ensuring that comments can be accessed confidentially by individual students and can be retained by students and the University.

63. A record of marking, which evidences the breakdown of marks for each assignment task, will be retained within the Student Information System. Only whole component marks are recorded.

Word Count/Length

64. Where a word count or length is specified in an assessment brief, students must adhere to this. If a student does not adhere to the word count or length, assessors may determine that the task has not been completed in accordance with instructions and reflect this in the mark awarded (see Appendix C for further guidance).
65. No arbitrary penalty shall be applied for exceeding the stated length of a task however, markers will cease considering content for the purpose of grading and feedback once the stated maximum length has been exceeded. Content beyond this point will not contribute to the determination of the awarded mark and will not be commented upon in feedback.

Moderation

66. Summative assessment outcomes shall be subject to moderation and confirmed by the Assessment Board in line with the [Assessment Boards for Taught Programmes Policy](#). The purpose of moderation is to provide assurance that assessment criteria have been applied appropriately and to verify academic standards. Where appropriate, moderators may raise concerns regarding marking with assessors, but it is not the role of internal or external moderators to reconsider any individual mark.
67. The moderation process is described in Appendix E.
68. Students shall be advised that where feedback on assessments is provided prior to the meeting of the Module Assessment Board, any marks indicated are provisional, may be changed following moderation and are subject to ratification by the Module Assessment Board.

Double Marking

69. The University's standard moderation processes provide the necessary assurance of consistency and fairness across the majority of modes of assessment and there is no case to introduce second marking as a requirement where moderation can be adequately complete. Second marking should only be used when it is not possible to use sample moderation or where it is specifically prescribed by a PSRB. Guidance on second marking is available [here](#).

Reassessment

70. Reassessment submission dates should be set at a time which is suitable for the programme and, where there is a School wide reassessment submission date, published within the University Activity Planner.
71. At the start of each module, students must be provided with details of all reassessment tasks and submission dates via module information on the module site within Blackboard.
72. A reassessment task must be the same task as that offered at first attempt unless there is an appropriate academic justification to set an alternative task. For example,

- where an individual has failed a group assignment task and is not able to join a group for the reassessment, it would be necessary to design a different equivalent task for reassessment;
- for unseen written examinations, an equivalent alternative version would normally be produced for reassessment.

73. For End Point Assessments (EPAs) on integrated apprenticeship programmes, reassessment rules are mandated by the Institute for Apprenticeships and Technical Education (IfATE) assessment plan. In such instances, the IfATE assessment plan is followed as an exception to the University academic regulations. Further details on reassessment at EPA can be found in the Higher and Degree Apprenticeships End Point Assessment Policy and in the specific module specifications/ EPA Handbook for specific programmes.

Exam Papers

74. Following the end of the reassessment period, all exam papers are shared with The Library for inclusion in the [past exam papers](#) site to support students in testing their knowledge and boosting confidence in advance of future exams. As past papers are shared with students, past papers should not be re-used to maintain the security of exam papers.
75. Exam papers from apprenticeship End Point Assessments (EPAs) will not be shared with the Library for inclusion in the past exam papers site. This is because exam question banks may be used for several years in line with IfATE guidance.

Academic Misconduct

76. Any improper activity or behaviour by a student which may give that student, or another student, an unfair academic advantage in a summative assessment is considered to be an act of academic misconduct. This is unacceptable in an academic community. All cases of suspected academic misconduct will be considered in line with the [Academic Misconduct Procedure](#) or the [Student Misconduct Procedure](#).

Personal Mitigating Circumstances

77. Where a student's ability to undertake or submit an assignment task is seriously affected by personal mitigating circumstances (PMC) a student may submit a request through the [Personal Mitigating Circumstances Procedure](#) that their PMC be taken into consideration by the University in respect of:
- late submission of the assignment task;
 - non-submission of the assignment task; or
 - non-attendance at an examination or similar scheduled and timed assignment task.

Assessment of Study Abroad

72. Where a student undertakes a period of Study Abroad as part of a programme of study, further information about how this will be assessed is available at:

Reasonable Adjustment Plans/Carer Support Plans

73. The reasonable adjustment and carer support plans seeks to put measures in place to mitigate the effects of a student's individual needs. Reasonable adjustments are made while the student is progressing through their programme and may affect the conduct of their assessments. These are documented in Reasonable Adjustments Plans which are developed by the Disability and Learner Support Service or through Carer Support Plans developed by the Student Diversity team.

Alternative and Modified Assessment

74. Principles and guidelines for agreeing and implementing alternative and modified assessments to accommodate the needs of disabled students are provided in Appendix F.

In-Year Retrieval Scheme

75. The University has an in-year retrieval scheme (IRYS) which provides level 3 and 4 students with an opportunity to recover failure in some summative assessments before the reassessment period. Essentially this offers students the opportunity to retrieve failure in assignment tasks, or to submit tasks that were not submitted at initial attempt, at a much earlier point in the academic year, closer to the point of module content to which the task relates. The Scheme is described in Appendix G.

[In Year Retrieval Scheme – FAQs for Staff](#)

[In Year Retrieval Scheme – FAQs for Students](#)

Retention and Disposal of Summatively Assessed Work

76. The University retains assessed work for various purposes including moderation, resolution of queries, academic misconduct cases, academic appeals and internal and external review. Schools must retain all electronic or physical submissions for a minimum of two months from the date the results were ratified by the Assessment Board.
77. In addition, Schools must retain samples of assessed work that have been internally and externally moderated in line with the process set out in Appendix E, together with the feedback provided on a six-year rolling basis for audit and review purposes. In addition, Schools should also accommodate any requirements set by Professional, Statutory and Regulatory Bodies.
78. Advice is available to Schools on the management and confidential disposal of assessed work from the [Information Governance Team](#).

Appendix F – Alternative and Modified Assessment Policy and Procedure for Disabled Students

Appendix G – In Year Retrieval Scheme

Appendix A Guide for Internal and External Verification of Assignment Tasks

1. Background and Purpose

- 1.1 The range of assessment for each programme is reviewed in detail at first validation (programme approval) and through periodic programme review. These processes should consider the mapping of assignment tasks against programme learning outcomes as well as the coherence of the proposed range of assessments. The vertical coherence of assessment should be reviewed to ensure that there is an appropriately scaffolded progression of tasks within and between levels. Subsequently, verification of summative assessment briefs is conducted to ensure the appropriateness and clarity of each assessment, to ensure that each assessment is inclusive and promotes effective learning.
- 1.2 Verification should take account of:
- intended learning outcomes;
 - level of study;
 - consideration of marking schemes/rubrics/model answers,
 - the characteristics of the student cohort;
 - proposed student effort required for the assignment task;
 - opportunities for outcomes/feedback to feed forward;
 - previous assessment outcomes.

2. Verification Process and Timing

- 2.1 Verification involves both internal and external review to ensure that assignment tasks meet both institutional and sector standards and offer an appropriate level of challenge to students as well as forming an authentic and accessible way to gauge student achievement.
- 2.2 Verification for all components of summative assessment is required every time an assignment task changes, where the weighting of a task changes, or every three years if the task has not changed.
- 2.3 Internal verification is undertaken by at least one member of academic staff from outside the module team.
- 2.4 External verification by the External Examiner is required:
- for assessments that contribute to the classification of qualifications;
 - for assessments at other levels, where required by Professional, Statutory and Regulatory Bodies (PSRB) or by collaborative provision agreements;
 - where assessments/modules outcomes have been identified as falling outside accepted norms;
 - for assessments which form part of the non-subject related English/Study Skills modules at level 3, and part of the International Foundation Year.
- 2.5 Verification of assignment tasks should be completed **before** the start of the module and before details are distributed to students.

- 2.6 First-sit assignment tasks and, where a different task is used for reassessment, should be verified at the same time.
- 2.7 The verification form is used to record the outcome of the verification process.
- 2.8 The Module Leader is responsible for ensuring that the following documents are made available to the internal verifier:
- verification form;
 - assessment brief describing the assignment task;
 - marking scheme/rubric;
 - the previous year’s assessment briefs and outcomes for comparison.
- 2.9 Internal verifiers should record the outcome of their verification process on the verification form, and either confirm that the assignment task and marking scheme/rubric are appropriate and record any examples of good practice or any concerns and suggested amendments. In the case of concerns, internal verifiers should discuss the comments with the Module Leader. Where appropriate an amended or new assessment brief and/or marking scheme/rubric is produced and the process of internal verification is repeated.
- 2.10 Once internal verification is complete, and where external verification is required, the Module Leader is responsible for ensuring that the following documents are made available to the External Examiner:
- verification form with details of internal verification completed;
 - internally verified assessment brief;
 - marking scheme/rubric;
 - the previous year’s assessment brief and outcomes for comparison.
- 2.9 External Examiners record the outcome of their verification process on the verification form, and either confirm that the assessment brief and marking scheme are appropriate, or record any concerns about the assessment brief together with amendments. Where necessary, originators produce an amended or new version, and the process of external verification is repeated until satisfactorily completed.

3. Retention of Verification Information

- 3.1 Schools must retain records of verification in line with the Information Retention Schedule, as these may be required if a student submits an academic appeal or complaint or for audit purposes.

Appendix B Stepped Marking Scheme

Where possible, it is advised that stepped marking is considered. Stepped marking refers to a restricted grade band marking scheme, where markers may only choose marks representing the upper, middle and lower range of each band, as illustrated in the table below (for levels 3 to 6). For example, in the adequate band must choose between 42%, 45% or 48%.

Marking Scheme

Undergraduate		Postgraduate	
Possible Mark Choices	Performance descriptor	Possible Mark Choices	Performance descriptor
100 95 92	Outstanding	100 95 92	Outstanding
88 85 82	Excellent	88 85 82	Excellent
78 75 72	Very Good	78 75 72	Very Good
68 65 62	Good	68 65 62	Good
58 55 52	Fair	58 55 52 50 (use as a capped mark only)	Satisfactory
48 45 42 40 (use as a capped mark only)	Adequate	45 40	Needs improvement
35 30	Needs improvement	35 30	Needs significant revision
25 20	Needs significant revision	25 20	Needs substantial work
15 10 5 0	Needs substantial work	15 10 5 0	Needs substantial work

Using stepped marking allows markers to indicate where the work sits within each band but removes the need to make very finely tuned judgements and avoids borderline marks. Stepped marking should make conversations between markers, students and moderators more straightforward. For holistic marking rubrics, the marker will select one mark from the list in the table, and for analytic rubrics (where multiple criteria are assessed separately) each criterion is marked separately, and the overall mark calculated based on the weighting of the different criteria.

Appendix C Assessment Length

1.0 Principles and Scope

- 1.1 It is often useful for tutors to provide guidance as to the appropriate length (word count, page number, time etc) for an assessment either to guide the student as to the expected amount of effort required or to address the specific pedagogic challenge of producing work to a given brief. Having an upper limit on the length of submission acceptable for a given task can help to protect students from spending a disproportionate amount of time on any one piece of work and can control the demands on staff required to assess the submitted work.
- 1.2 Where a guide length is provided it is important that the nature of this is stated explicitly to students including full details of what is included in this e.g. page lengths, font size, margins etc. where page lengths are used, or whether references, tables, appendices etc. are included if a word count is specified.
- 1.3 Regardless of how the length is specified, it is essential that the nature of this limit and margin of acceptability is detailed in the assessment brief. A clear distinction is required to identify the upper limit of length beyond which work will not be accepted for consideration to derived mark.
- 1.4 Under no circumstances should there be an arbitrary deduction of marks for excessive length. Rather, the assessor should cease consideration of content at the specified length and award marks only on the basis of work within the stated acceptable upper limit of length.
- 1.5 Where producing work to a specific, fixed length is an essential skill / ILO then we should when possible use the available technology to create assessment templates that do not allow submission of more than the allowable limit. – This is common practice in many online forms and prevents students exceeding the limits (limits can be set by no. characters, no. words, or no. pages as appropriate).
- 1.6 Where use of a constraining template is not possible or appropriate, the maximum length should be clearly articulated in the assessment brief (providing full details of how this will be determined) and consideration of content will cease during the marking process at the prescribed length.
- 1.7 Where the assessment length is for guidance and adherence is not an essential outcome or ILO, the submission rules should reflect this. The guidance length should be communicated in as much detail as possible and be sufficient to permit students to meet the assessment criteria. To help manage student effort and to manage marking workload, an upper allowable limit is still advisable. This should be set at a level that reflects the nature of the limit, typically ~10%. Where work exceeds this upper limit assessor should cease consideration of content at the specified length and award marks only on the basis of work within the stated acceptable upper limit of length.

Table 1 Examples of application of guidance

Example	Proposed action	Rationale
<p>Assessment length set for guidance of effort and to control marking load.</p>	<p>Set guide length as 'n' pages / words / minutes etc with an upper limit for acceptable length (typically +10%). Do not mark beyond stated upper limit. Where possible configure submission to only accept work up to upper limit.</p>	<p>Sets expectation with guide length. Does not impose an arbitrary penalty. Provides scope for students to write more if necessary but prevents really excessive length to constrain both student and marker workload.</p>
<p>Assessment seeks to address the development and evaluation of concise writing skills.</p>	<p>Use assessment template to constrain submission length e.g. by the creation of web or word forms with maximum word / character / or line numbers, upper limit on file size or media length.</p> <p>Students are unable to submit work beyond the accepted length.</p> <p>If maximum length can't be constrained by technology, make clear the absolute limit and do not mark content beyond stated upper limit.</p>	<p>Prepares students in an authentic manner for completion of many forms. Does not apply an arbitrary penalty.</p> <p>Prevents students from exceeding the acceptable limits.</p>

Appendix D Assessment Standardisation and Calibration

This section explains different types of standardisation activity and how they are organised and carried out.

	Title	Timing	Circumstances it takes place.	Aim	Impact on students' marks
A	Assessment Calibration (pre-assessment)*	Prior to the assessment activity	<p>Routinely for:</p> <ul style="list-style-type: none"> • Apprenticeships • Collaborative provision (unless agreed otherwise) <p>It also may be used where several people will be marking as part of a team.</p>	To gain a shared understanding of the application of rubrics to either a specific type or level of assessment and so increase understanding of the assessment and minimise risk of discrepancies when the marking actually takes place. It may also include a reflection on similar previous marking exercises.	No direct impact on any individual student marks.
B	Standardisation (see guidance below)	As part of assessment marking (prior to internal moderation)	<p>Routinely for:</p> <ul style="list-style-type: none"> • Collaborative provision (unless agreed otherwise) <p>It is also used where several people will be marking as part of a team including Apprenticeships.</p>	To ensure consistency of the application of rubrics in marking.	Individual student marks as part of the sample used may change because of the exercise.
C	Assessment Calibration (post-assessment)*	After internal moderation and/or external moderation	<p>Routinely for Apprenticeships</p> <p>It also may be used in other circumstances if considered appropriate based on feedback from internal and/or external moderators have raised issues.</p>	<p>To review and learn lessons from assessment marking activity that can be used to inform future assessment marking.</p> <p>For apprenticeship it may also involve calibration against other apprenticeship providers and include employer feedback on assessment.</p>	No change in student marks as result of the exercise.

*Depending on timing A and C make take place in the same session.

Guidance on how to run an assessment calibration event (A and C)

The main purpose of calibration is to maintain academic standards within a programme team or across related programmes. It is a process of peer review which involves dialogue, negotiation and joint decision making, comparing judgements on student work to reach a shared understanding of the academic standard at each level. In addition to being an important quality assurance mechanism for improving marking and moderation, calibration offers important collaborative learning and professional development opportunities for academics.

For further information on calibration, see the resources from the Advance HE "Degree Standards" project <https://www.advance-he.ac.uk/degree-standards-project/calibration-academic-standards>.

A calibration activity involves the following:

1. Examples of student work from one assessment component (e.g. written assignment, video of performance, artefact) representing high, medium and low levels of student attainment.
2. An agreed reliable mark for each piece of work (e.g. the moderated grade originally given, confirmed by the module/programme leader) along with an explanation of the reasons for the mark awarded, with reference to the contextual information and external reference points below.
3. Contextual information about the assessment component e.g. learning outcomes, assessment brief, marking rubric and criteria. Also, the relevant external reference points, e.g. subject benchmark statement, FHEQ and professional standards.

Examples of student work are discussed with the aim of reaching a consensus as to the standard of each piece of work, taking account the full range of arguments. The discussion focuses on making reasons for judgements explicit and considering them in detail. This enables the participants to gain an in-depth understanding of the standards, and the aim is that repeated participation in calibration activities will over time result in 'calibrated academics'.

The approach adopted for calibration involves two main stages: a pre-activity marking task and a facilitated workshop activity (in person or online).

In advance of the workshop (e.g. one week before), the participants are each sent electronic copies of 3-5 pieces of student work representing a range of student work and are asked to place each within a 10% band according to the university descriptors, based on the marking rubric and criteria for the task; in addition, participants can also be asked to give a specific percentage mark for each piece. They then submit their bands and marks anonymously to a central coordinator (e.g. using an MS Form set up for this). Before the workshop, the facilitator collates the

marks and produces graphs/tables showing the distribution of marks for each piece of work.

At the workshop, participants are shown the range of benchmark standards that have been awarded to each piece of work and the variation in terms of grades given. Small-group discussions (F2F groups or break out groups for virtual workshops) are then held to consider these results, with the aim of achieving a group consensus on the band/grade for each assignment and for the markers to reflect on what influenced their decisions.

A whole group facilitated discussion is then held with a view to achieving a consensus regarding the grading decisions, bringing the previously agreed reliable mark and rationale into the discussion. In addition, a list of common characteristics that influenced their judgements is compiled.

For support in facilitating these workshops and the broader calibration process, please contact the Academic Developers within LTEC: [LTEC Team](#)

Guidance regarding how to run an assessment standardisation event (B)

Assessment standardisation should take place where more than one assessor will be marking an assessment (i.e. where there is a marking team). The aim is to ensure consistency of the application of rubrics in marking for a specific assessment. The following guidance sets out the minimum requirements for standardisation. Marking teams or Associate Deans Academic may identify a need for additional steps and/or more formal record keeping in relation to standardisation than is described here. It is important to note that this standardisation activity should take place before assessments are formally marked and is a distinct activity which is separate to moderation.

The assessment standardisation activity should normally be planned to take place within three working days of the assessment submission deadline. It should not take much longer than this as it may affect the ability of the marking team to meet assessment feedback deadlines. The standardisation meeting should be set up well in advance. Where marking takes place with international partners it is important to allow for differences in both time zones and days of the working week.

1. **Day one after submission deadline.** One of the marking team, normally the most experienced member of staff, scans through the submissions to choose four or five submissions that, from their initial review, seem to represent the high, middle, low and fail range of submissions. They do not include examples of very poor/clear fail submissions. The selected assessments are randomly labelled A, B, C, etc and shared with the marking team. How they are shared will depend on the nature of the assessment. Although the selection will have been chosen based on a preliminary view of the assessments being high, middle, low and fail, information about which assessment falls in to each group should not be shared with others in the marking team as it may prejudice their considerations.

2. **Day two after submission deadline.** All the marking team (including the person who did the initial selection) apply the marking rubric to the sample and determine their initial mark. The marking team are not expected to include student feedback; however, they may find it helpful to make a few notes that may be useful in the Standardisation meeting.
3. **Day three after submission deadline: The standardisation meeting.** The marking team meet (in person or online) and share their view of the initial marks for the sample assessments. The discussion should then focus on the assessments where there are substantial differences in the marks between the members of the marking team. Where there is little or no difference between the marks, the marking team should still review how the overall mark was derived from the rubric to identify if there are differences in the application of the rubric. As a result of the meeting, all those doing the marking should feel confident that they will apply the rubric consistently as team.
4. **After the standardisation meeting.** All the assessments, including the sample assessments, are then formally marked and student feedback prepared. Once all marking is completed, internal moderation takes place (see separate guidance).

Appendix E Moderation Process

1.0 Background and Purpose

- 1.1 The purpose of moderation is to provide assurance that assessment criteria have been applied appropriately.
- 1.2 Moderation involves both internal and external review.
- 1.3 Internal moderation is required for all assignment tasks which are summatively assessed. The internal moderator must not have participated in marking the assessment but should be familiar with marking at the appropriate academic level and subject area. Wherever possible the moderator should not be a member of the module team. For programmes delivered by collaborative provision, internal moderation should involve staff from the University of Salford.
- 1.4 External moderation is required:
 - where assessments contribute to classification of a final award;
 - where required by PSRBs;
 - for assessments which form part of the non-subject related English/Study Skills modules at level 3, and part of the International Foundation Year.
- 1.5 Moderation of assignment tasks submitted for reassessment is required where the reassessment task is different, or if the marking team has changed.
- 1.6 In the case of assessments which do not include a written submission (e.g. music performance, clinical activity or an oral presentation) the assessment record (i.e. feedback sheet) must be made available for moderation purposes as a minimum. Wherever possible, video or audio recordings of the student work should be provided.
- 1.7 Where a marking team consists of multiple individuals, a standardisation exercise should take place to ensure consistency between markers. For example, before marking starts, the module leader should choose a small sample of student work to be assessed independently by all the markers using the assessment criteria. The marking team then meets up to discuss their grades and to agree on the academic standards for the task (see Appendix D regarding the standardisation process).

2.0 Moderation Process

- 2.1 The module leader provides the internal moderator with:
 - standardisation and moderation form
 - assessment brief;
 - marking scheme/rubric/model answers;
 - marked student work and feedback.

2.2 The internal moderator reviews a representative sample of student work but should have access to all assessments if requested. The sample should:

- consist of a minimum of 10 assessments or 5% of the assessments (whichever is greater) or all assessments if there are fewer than 10 students in the cohort;
- reflect the full range of mark bands;
- include samples of work marked by all assessors;
- include examples of work from all programmes on which the module is delivered.
- where Partners are involved, each Partner is treated as a separate cohort for the purposes of calculating sample sizes, once the sample is selected, moderation should take place across all partners and UoS students.

A greater sample than the minimum may be needed in order to incorporate these requirements.

2.3 The outcome of the internal moderation process is recorded on the [standardisation and moderation form](#). The internal moderator either:

- confirms that the assessment process has been carried out appropriately; or
- records any concerns about the process on the standardisation and moderation form.

In the case of concerns, the internal moderator discusses the assessment process with the assessor(s). Depending on the discussion, no further action may be necessary, or the assessor(s) reconsider the marks given to the entire cohort of students; and, as a consequence, make changes to all marks, for example by scaling up or down the whole cohort.

2.4 The outcome of any discussions between the internal moderator and the assessor(s), together with a note of any action taken, is recorded on the standardisation and moderation template.

2.5 The module leader provides the External Examiner with the following:

- standardisation and moderation form (detailing internal moderation process/outcome)
- assessment brief;
- marking scheme/rubric/model answers;
- internally moderated sample of student work and feedback,

The external moderator either confirms that the assessment process has been carried out appropriately or records any concerns about the process on the standardisation and moderation template. In the case of concerns, the external moderator discusses the assessment process with the assessor(s). Depending

on the outcome of the discussion:

- no further action may be necessary OR
- the assessor(s) reconsider(s) the marks awarded for the entire cohort of students if concerns apply to all students OR
- the assessor(s) reconsider(s) the marks for sub-sections of the cohort where concerns about the application of the marking standardisation and calibration process have arisen.

2.6 The outcome of any discussions between the external moderator and the assessor(s), together with a note of any action taken, is recorded on the standardisation and moderation form.

3.0 Retention of Moderation Information

3.1 Records of moderation must be kept in line with the Records Retention Schedule and may be required for the purpose of considering an academic appeal or complaint or for audit purposes.

Appendix F Alternative and Modified Assessment Policy and Procedure for Disabled Students

1. Purpose

- 1.1 This Policy outlines requirements for an alternative and modified assessment strategy. The associated Procedure outlines the process for applying for alternative and modified assessments for disabled students.
- 1.2 The Policy and Procedure apply to all disabled students registered on University of Salford taught programmes, including students studying at partner institutions.

2. Definitions

- 2.1 **Inclusive assessment** focuses on the way in which assessment design can proactively minimise the likelihood of students being excluded, overlooked and/or disadvantaged through the ways in which they are assessed across their studies.
- 2.2 In the context of an assessment, a **reasonable adjustment** is a change to an assessment to ensure that a student has a fair and equitable opportunity to complete an assessment without disadvantage. Reasonable adjustments may include modified or alternative assessments.
- 2.3 A **modified assessment** is where a student undertakes the same assessment as their peers, but there is a modification to the assessment for disability related reasons. For example, additional time in an examination, or an individual room for a student to take an examination.
- 2.4 An **alternative assessment** is where a student, for disability related reasons, is unable to engage in the same assessment as their peers, so an alternative assessment is needed. For example, where a student is unable to engage in a presentation, even with modifications, it may be appropriate to permit the student to complete a piece of written coursework instead.

3. Policy

- 3.1 The following principles must inform assessment strategies:
 - All assessments must be inclusive by design, where possible.
 - Choice within the assessment strategy should be offered to all students, where possible, to limit ad-hoc changes to assessment strategies for disabled students.
 - An appropriate modified assessment, or an appropriate alternative to the standard assessment, should be provided for students who are unable to undertake the standard assessment due to a disability or long-term health

condition to ensure that all students are able to engage with the assessment task fully.

- Assessments should also follow the inclusivity principles stated within the Assessment and Feedback Policy.
- The alternative or modified assessment must meet and assess equivalent learning outcomes as the original assessment.
- The alternative or modified assessment should be of an equivalent level and standard to the original assessment.
- The External Examiner should be involved in the approval of the alternative assessment or modified task.
- If the alternative or modified assessment is provided as a reasonable adjustment for a student with a disability, then it must be appropriate for that student's needs.
- Alternative or modified arrangements must not give a student an unfair advantage over other students or disadvantage them due to their disability or health condition.

3.2 There are very few circumstances when it would not be possible to offer an alternative or modified assessment. Professional, Statutory and Regulatory Bodies (PSRBs) accredited or regulated programmes may have prescribed assessment types. In these cases, the Programme Leader should contact the PSRB to establish whether an alternative is permitted. If an alternative is not permitted, then no further action can be taken in relation to a change to the assessment. Programme teams should, however, explore alternative support and modifications to enable the student to complete the original assessment if an alternative assessment is not permitted.

3.3 Where it is not possible to design inclusive assessments (e.g. due to requirements put in place by a Professional, Statutory and Regulatory Body (PSRBs), a rationale must be included on the module specification and approved in line with the Programme Validation Policy.

3.4 It is recognised that it is not possible to draw up a set of arrangements that are appropriate for every student as this will depend on individual circumstances. Appendix A offers examples of modified and alternative assessments.

4. Procedure

4.1 Students who disclose a disability or long-term health condition to the University (or their partner institution) will be invited to discuss their needs with the Disability Inclusion Service (or equivalent at a partner institution). Where appropriate, a Reasonable Adjustment Plan (RAP) (or equivalent) will be created for the student.

4.2 A student must have a Reasonable Adjustment Plan (RAP) in place to enable consideration to be given to modified or alternative assessments. RAPs can

be set up at any stage of study by the Disability Inclusion Service and can be updated or reviewed as needed.

- 4.3 A student can submit an application [[add link to online form](#)] for a modified or alternative assessment. Strict deadlines apply to request an alternative/modified assessment. This is to enable the alternative assessment or modified assessment to be put in place prior to the assessment date/deadline. Applications must be received no later than two weeks after the start of the relevant module.
- 4.4 The Disability Inclusion Service will undertake an initial review of each application to:
 - Determine whether the request could be met within a RAP;
 - Seek further information or clarity from the student where needed;
 - Decide if the request can continue along the alternative assessment process.
- 4.5 When sufficient information is available, the Disability Inclusion Service will liaise with the student's Module Leader(s)/Programme Leader to discuss the application with final sign off by the Associate Dean (Academic).
- 4.6 It is the responsibility of the student's School to inform the student whether or not a modified or alternative assessment has been approved by completing the relevant section on the application form. This should be sent to the student using their University of Salford email account (copied to disability@salford.ac.uk) no later than 10 working days after receipt request of the request, or sooner where possible. Where it has not been possible to approve a request, a rationale should be provided on the application form.
- 4.7 If the request is rejected, a student may wish to discuss the outcome with their Programme Leader. If, after discussion, a student disagrees with the outcome of their request, the route of escalation is through the Student Complaints Procedure. Timescales associated with the Student Complaints Procedure apply. Independent advice and guidance are available from the [Students' Union Advice Centre](#).

Appendix A Examples of Modified and Alternative Assessments

Barrier	Rationale for Approval	Examples of Assessment Modifications	Examples of Alternative Assessments
Recall	<p>Where the ability to recall specific information due to a disability, particularly where time constraint increases stress and the ability to recall.</p> <p>Where the effect of medication impacts upon recall.</p>	<p>Glossary of terms to be provided for the exam</p> <p>Crib sheets to be taken into the exam under agreed constraints</p> <p>Open book exam</p>	<p>An assessment strategy which does not rely on recall, for example an assignment or presentation.</p>
Duration of exam	<p>Where the duration of the exam will have a detrimental impact on the student due to concentration/fatigue levels, excessive pain or general health if expected to undertake an exam of a significant length.</p> <p>Consideration in incidences where the nominal ten minutes per hour rest breaks would not be sufficient adjustment. Or where the rest breaks and extra time extend the overall duration of the exam, prolonging the impact that the access arrangements are designed to mitigate against.</p>	<p>Exam split into two exams of shorter duration to be undertaken within the same day, with an extended rest break (with supervision) between the two papers.</p> <p>Exam paper split into two exams of shorter duration which may be undertaken on different dates.</p> <p>To ensure academic integrity a second paper will be required.</p>	<p>An assessment strategy which permits the student to demonstrate their competence with no time constraints and which allows rest breaks and the environment to be controlled by the student for example by delivery of a presentation or take away exam paper.</p>
Exam Environment and Conditions	<p>Where there are levels of stress which are outside of the normal expected levels which students sitting an exam may experience,</p>	<p>Paper completed away from exam venue as a takeaway paper</p>	<p>An assessment strategy which does not rely on an exam environment or which does not impose exam conditions for example an</p>

Barrier	Rationale for Approval	Examples of Assessment Modifications	Examples of Alternative Assessments
	which may be detrimental to the student's health, which cannot be reduced to acceptable levels with the implementation of a separate room and/or rest breaks.		assignment, presentation, seen paper, online test or exam paper completed outside of exam room conditions.
Presentation delivered in front of an audience	The student experiences levels of anxiety/stress prior to or potentially during a presentation which are outside of the normal expected levels which students delivering a presentation may experience and which may therefore have a detrimental impact upon their health.	Permit student to submit a pre-recorded presentation.	An alternative assessment may only be considered where the actual delivery of a presentation is not a PSRB requirement/core competence /ILO.
Group work	Where individual characteristics make it extremely difficult (outside of the norm) when enforced to work with peers in a collaborative manner without increasing the level of anxiety to such an impact it may become detrimental to the student's wellbeing.	After the initial negotiation of topics and assignments of tasks for the student to conduct their own individual aspect of research and to deliver their own section of the presentation without the requirements to collaborate with peers with regards content, timeframes and final presentation.	Alternative assessment may only be considered where group work and collaboration is not a PSRB requirement/core competence/ILO.
Timed Practical Assessment	Where individuals can demonstrate their competence but would be unable to demonstrate the competence under time constraints.	Additional time for demonstration of skills or rest breaks between stations. Allow reading time prior to the assessment under quarantine conditions of brief/questions.	Allow student to instruct a third party to undertake the demonstrate of the skills (where not restricted under PSRB requirements/core competences/ILOs. For example, giving an instruction to a third party to carry out a particular procedure or task.

Appendix G In-Year Retrieval Scheme

1.0 Principles

- 1.1 The University's in-year retrieval scheme (IYRS) enables eligible students to recover failure in some summative assignment tasks at a much earlier stage in the academic year, and closer to the point of delivery of the module content to which the task relates. In-year retrieval is based on the premise that students will be able to re-work the same task (where possible) and act upon constructive feedback in order to improve the standard of their work. In-year retrieval does not affect a student's right to re-assessment and re-take attempts.
- 1.2 This scheme applies only to level 3 and 4 students who are at the start of their higher education journey and who may need to familiarise themselves with the conventions of assessment in HE. Completion of level 3 provides students wishing to progress to a relevant degree programme with the relevant entry criteria. The Framework for Higher Education Qualifications requires that students completing level 4 will have a sound knowledge of the basic concepts of their subject and will have learned how to take different approaches to solving problems.
- 1.3 This scheme applies to students who have submitted and failed one or more assignment tasks and to students who did not submit.
- 1.4 This scheme does not apply to students studying on accelerated degree programmes as these students have a different assessment pattern.
- 1.5 This scheme does not apply where students have passed an assignment task.
- 1.6 In-year retrieval is optional for students. Eligible students may choose whether they wish to engage with the in-year retrieval scheme. It is recognised that undertaking in-year retrieval will increase the workload on students; however, this is off-set by the benefits associated with passing the module and avoiding the need for reassessment.
- 1.7 All in-year retrieval assessments must be submitted, and all assessment procedures concluded, before the meeting of the relevant Module Assessment Board so this scheme only applies to summative assessments which can be accommodated in this timeframe.

2.0 Procedure

- 2.1 At the end of the 15 working day feedback period, students who have achieved a mark which is below 40% or who did not submit, will be contacted by the School's Student Progression Administrator or nominated member of staff. Communication with the student will include information about the scheme, assessment help and support, details of the assignment task, the retrieval submission date and submission process. There is an expectation that students will receive academic and pastoral support.
- 2.2 Retrieval assessment deadlines are at the discretion of the Module Leader, in consultation with relevant staff. Normally, students will have a period of two weeks to complete a retrieval assessment.
- 2.3 As in-year retrieval will be conducted within a short space of time after the original submission, late submission does not apply to retrieval deadlines nor does the Personal Mitigating Circumstances Procedure.

- 2.4 Where students have extra time for submission documented through a Reasonable Adjustment Plan or a Carer Support Plan, the extra time will apply to the in-year retrieval deadline.
- 2.5 At retrieval students are required to re-work and submit the original piece of work or, wherever possible, engage in the same assessment (e.g. a practical or performance). Where it is not possible to recreate the same assessment (e.g. group work, etc.), an alternative verified assessment should be provided which tests the same learning outcomes. In-year retrieval assessments will be submitted using the same mechanisms as the original assessment. Where assessments are submitted through Blackboard (unless an exception is in place) it will be via an additional retrieval folder
- 2.6 Where a student achieves a lower mark at retrieval, the original higher mark will be used for the purpose of module mark calculation. All in-year retrieval assessments will normally be capped at the pass mark of 40%, except where there is an accepted PMC for the original assessment.
- 2.7 Where a student is making use of the IYRS to meet a higher grade threshold (above the minimum pass mark) required for progression on certain programmes, the IYRS mark will be capped at 40% or the original mark achieved awarded, whichever is higher.
- 2.8 Where the module does not require the student to pass each component of assessment (Method A) and the module is failed if, following retrieval, the capping of the component mark prevents the student from passing the module, the module mark will be capped rather than the component mark.
- 2.9 Where a module requires the student to pass one or more components of assessment (Method B) and a student has failed a must-pass component, the maximum mark for any re-assessed component will be the pass mark. This mark will contribute to the overall module mark.
- 2.10 Where a student achieves a pass mark at retrieval, further feedback will not normally be provided.
- 2.11 Where a student fails a retrieval attempt, markers are required to provide feedback. Feedback on retrieval assessments must be provided within 15 working days of the retrieval assessment submission date.
